PROJECTS

Mobile AI Driving Assistant

- A mobile application that uses AI and image processing to detect lanes and speed signs.
- The app alerts the driver to speed limits, speeding, and lane drift.

Wallet Management App

- Mobile application created as part of the Student Learning with Communities module that aims to help people with disabilities manage their money during transactions.
- Shows the user have much to give/receive using visual and audio cues.

Forums Web App

- A web application which contains a forum, file storage system, and user roles for specific privileges within the application. Designed for use in companies/organizations/clubs etc.
- Front-end was developed using HTML, CSS, and JavaScript. Python and the Flask framework was used for the back-end and a Microsoft SQL Server was used to store data.

EMPLOYMENT HISTORY

Cashier, Ho Wun Restaurant

Meath

Jun 2016 — Jan 2019

- Handled all customer interactions in a busy, fast-paced environment.
- Assisted in the training of 3 new employees.
